Monday, August 24—p. m.

The stock market to-day was excessively dull, and lower prices were recorded for nearly all the active stocks. There was a fall in sterling exchange and a further tightening of money. The announcement of a receivership for the Louisville, New-Albany and Chicago Ratiroad, known as the Monon Route, created no surprise and depressed the county of the count prise and depressed the stock only fractionally The company's consolidated 4 per cent bonds. however, fell four points. The stock of this company, of which there are two classes, has in Manhattan consolidated was ascribed to the closing of short contracts to take profit.

While there have as yet been no engagements of gold for importation to this country in addition to the lots which left the other side the clusive of nine days' interest at the New-York rate, about 1½ cents a pound. Accordingly the specie importing point, without allowing for New-York interest, works out at practically 4.83½. New-York interest, works out at practically 4.83½. New-York interest, works out at practically 4.83½. If a commission of one-eighth of 1 per cent can be obtained for the gold, the greater part of the reduction for New-York interest is offset, and the importing point is made something like 4.85½ or 4.85½ Last week at one time demand sterling touched 4.85, and commercial bilis were offset at rates equal to a still lower figure for demand bills. It would appear, therefore, that there is an actual profit in the gold now on the way to New-York. American gold coin purchased in Europe might yield a better return to importers than bars when abrasion is taken into consideration. The coin would be bought by weight, and if not abraded in excess of one-half of 1 per cent. Would appear, therefore, that there is an actual profit in the gold now on the way to New-York. American gold coin purchased in Europe might yield a better return to importers than bars when abrasion is taken into consideration. The coin would be received by the United States Treasury at its full face value.

To to date no Clearing House have been issued, but it is understood that several banks will take out certificates before the end of the week. The Loan Committee of the Clearing House will hold daily sessions to receive applications and to pass on collateral. As stated, collateral will be taken at 75 per cent of its market value. Interest at the rate of 6 per cent will be charged on the certificates, and addition a commission of one-sixteenth of 1 or its market value. Interest at the rate of 6 per cent will be charged on the certificates, and in addition a commission of one-sixteenth of 1 per cent will be exacted. Should \$25,000,000 or \$30,000,000 of certificates be taken out the money market would be eased materially. There is a disposition on the part of the National banks to increase their circulation. With the high rates for money there is an advantage to the banks in extending their circulation.
